GenViz Module 6:
Q & A, discussion, integrated assignments, and working with your own data

Malachi Griffith, Obi Griffith, Zachary Skidmore
Genomic Data Visualization and Interpretation
April 8-12, 2019
Freie Universität Berlin

The Elizabeth H.
and James S. McDonnell III

**McDonnell

Attribution-ShareAlike 4.0 International (CC BY-SA 4.0)

This is a human-readable summary of (and not a substitute for) the license. Disclaimer.

You are free to:

Share — copy and redistribute the material in any medium or format

Adapt — remix, transform, and build upon the material for any purpose, even commercially.

The licensor cannot revoke these freedoms as long as you follow the license terms.

Under the following terms:

Attribution — You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so in any reasonable manner, but not in any way that suggests the licensor endorses you or your use.

ShareAlike — If you remix, transform, or build upon the material, you must distribute your contributions under the same license as the original.

No additional restrictions — You may not apply legal terms or technological measures that legally restrict others from doing anything the license permits.

Learning objectives of the course

- Module 1: Introduction to genomic data visualization and interpretation
- Module 2: Using R for genomic data visualization and interpretation
- Module 3: Introduction to GenVisR
- Module 4: Expression profiling, visualization, and interpretation
- Module 5: Variant annotation and interpretation
- **Module 6: Q & A, discussion, integrated assignments, and working with your own data**

- Tutorials
  - Provide working examples of data visualization and interpretation
  - Self contained, self explanatory, portable

Learning objectives of module 6

- Q & A, discussion, integrated assignments, and working with your own data

Questions and discussion

Before starting with the advanced exercises, are there any questions or topics for discussion?

Integrated assignments and working with your own data

Two general options

1. If you have your own data. Try to apply something you learned this week to visualize that data

2. If you don't have your own data, there are optional integrated exercises in module 6 at www.GenViz.org
